Calicut University Four Year Undergraduate Programme (FYUGP)

FYUGP or the Four-Year Undergraduate programme, is a new curriculum introduced by the University Grants Commission (UGC) of India. The goal of FYUGP is to provide undergraduate students with a more holistic and flexible education.

The key features are:

1. Four-year duration: The programme extends the traditional three-year undergraduate degree to four years, allowing for a more comprehensive learning experience.

2. Multiple exit options: Students can exit with a bachelor's degree after three years or an honours/ research degree after four years.

3. Flexible curriculum: The curriculum is designed to be interdisciplinary, allowing students to explore a range of subjects beyond their core area of study.

4. Skill development: in addition to academic coursework, FYUGP emphasizes the development of practical skills and hands-on learning through internships, project- based work, and community engagement.

5. The Four-Year Degree is compatible with the international standards and thus provides opportunities to students to pursue their higher studies outside the country without losing a year. The new system also provides the facility of transfer in-between the course duration to other colleges/ universities or even interstate transfer is possible.

6. Those who have completed a four-year honours UG need to study only one year for the Post graduate programme in their subject and can appear for the NET exam.

7. Students with a 75% mark (or cumulative CGPA 7.5) in the first six semesters only are eligible to continue

for the Honours with Research in the fourth year. (5% mark or 0.5 in CGPA will be exempted for reservation category students). Those students completing Honours with Research can pursue research in their specialised subject

8. There is provision to complete the degree in two and a half years and degree with honours in three and a half years.

The implementation of FYUGP is expected to enhance the quality of higher education in India, fostering critical thinking, creativity, and adaptability among the undergraduate students.
